Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/2008 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stryker Leibinger (DE 201 05 590 U1) in view of Clark (US Patent 5,954,747). Stryker Leibinger discloses a device for inserting a suture anchor (such as a drill component or a connecting component) having a hollow guide sleeve (16) through which a suture thread anchor may be passed, a distal end of a guide sleeve having a front annular face (36), and wherein the guide sleeve comprises a point projecting distally from the front annular face of the guide sleeve, and wherein a shoulder is formed between the distally projecting point and the remaining part of the annular face. See drawing below.

It is further noted that the shoulder is considered to extend in a cross section plane and is substantially perpendicular to a longitudinal axis of a guide sleeve (A).

Stryker Leibinger disclose the claimed invention except for a guide sleeve comprising a single point, compared to the multiple points shown above. Clark discloses a bone anchor system that has a guide sleeve with one point extending from the distal end (see Fig. 3). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Stryker Leibinger having at least a single point projecting distally, as this construction would be beneficial in contacting the bone surface for optimum positioning of the suture anchor.

Response to Arguments

Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
